

SATURDAY 17 MARCH 2018 FLOOD MITIGATION & EROSION CONTROL

Join Toowoomba Landcare Group for a community field day to learn how protecting your property from erosion can provide environmental benefits and, in some cases, flood mitigation.

Adam Berry, Floodplain Management Engineer, will explore the benefits of slowing water flow and working with vegetation and natural in-stream structures. Adam has been working in flood management for more than fifteen years and is particularly interested in natural floodplain management techniques.

Event program

- 9am - presentation from guest speaker
- 10:30am - field visit at Federation Park
- 12pm (optional) - lunch at Bull and Barley Inn, Cambooya
